### Step padding retrofit kit clip-step

- Meet the increased requirements on work safety and provide for optimised non-slip protection, safe footing and comfortable standing on our stepladders
- The step padding made of grooved plastic is clipped onto the step to cover the whole surface and is custom-fit; it can be removed again without damage to the ladder and leaving no residue
- The clip-step step padding is applied up to the max. accessible step as per DIN EN 131 in the case of stepladders accessible from both sides, thus functioning as a visual check that the ladder is being used correctly
- Also available singly as accessories. The price per clip-step step padding is €15.00 excluding VAT
