

I always insist on quality

WA  **KÜ**
Brilliant. Original.

The original makes the difference

1 Maintenance-free WAKÜ quality: rugged stainless steel pins reliably and visibly lock the sturdy, corrosion-proof aluminium hinges.

2 8 special rivets through the stringers ensures an extremely rigid joint with the hinge.

3 Solid, ergonomically shaped aluminium height adjusters guarantee easy and absolutely safe locking of the required ladder height.

4 Four-folded rung ends remain positively joined to stringers even in heavy-duty use.

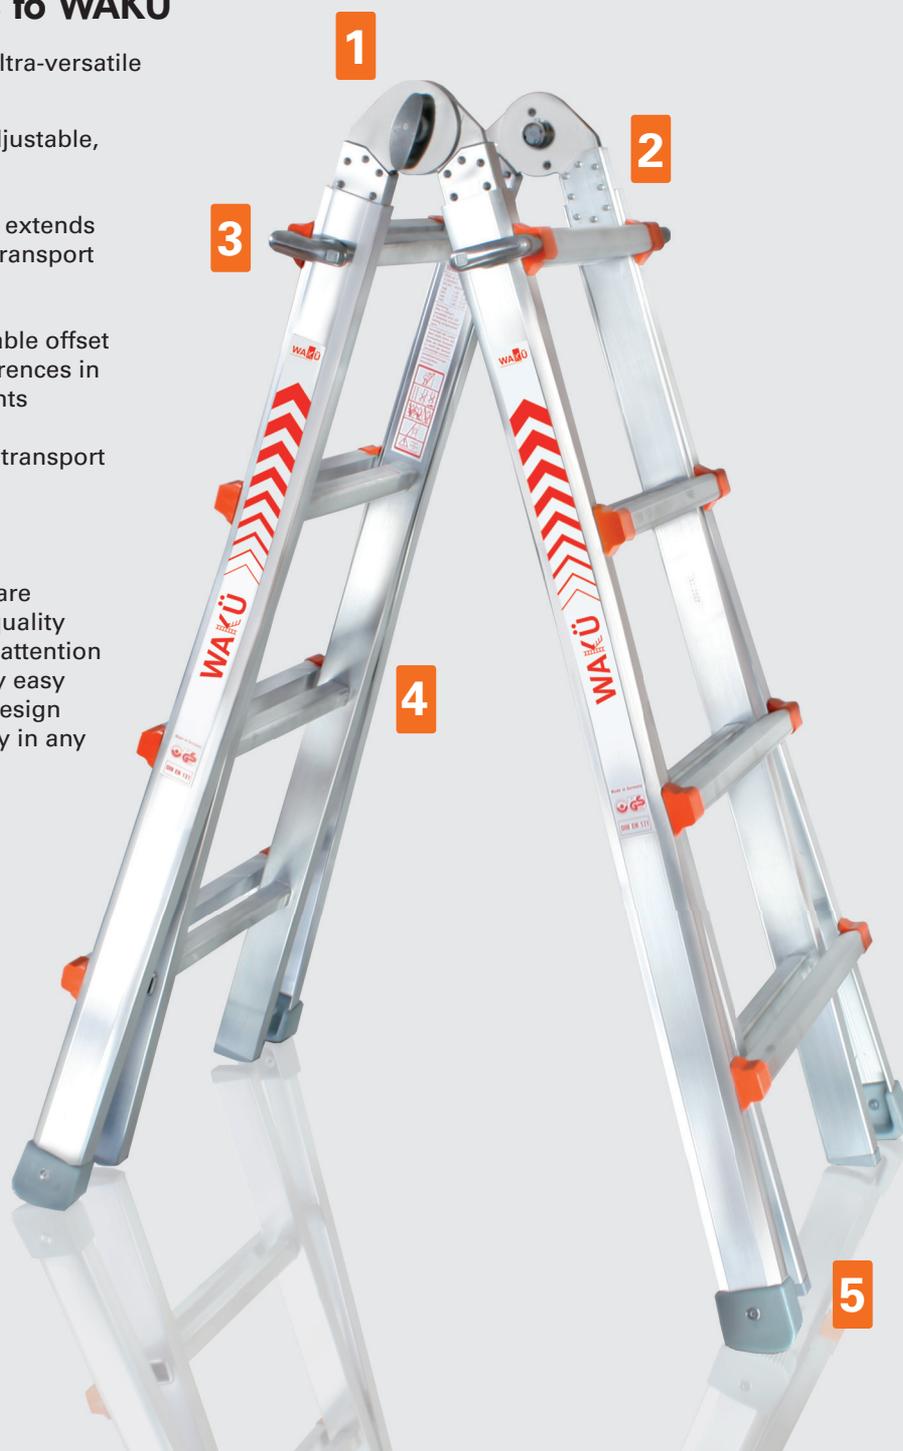

5 Maximum non-slip effect while also protecting the flooring: large corrugated hard rubber foot pads are riveted to the ladder stringers.

Everything points to WAKÜ

Enjoy the benefits of the ultra-versatile WAKÜ telescopic ladder:

- Double ladder: height-adjustable, rung by rung
- Single extending ladder: extends to almost four times its transport length
- Step ladder: with adjustable offset to cope with height differences in stairwells and on gradients
- Space-saving design for transport and storage

WAKÜ telescopic ladders are manufactured from high-quality materials with convincing attention to detail and are extremely easy to handle. Their tapering design ensures maximum stability in any application.

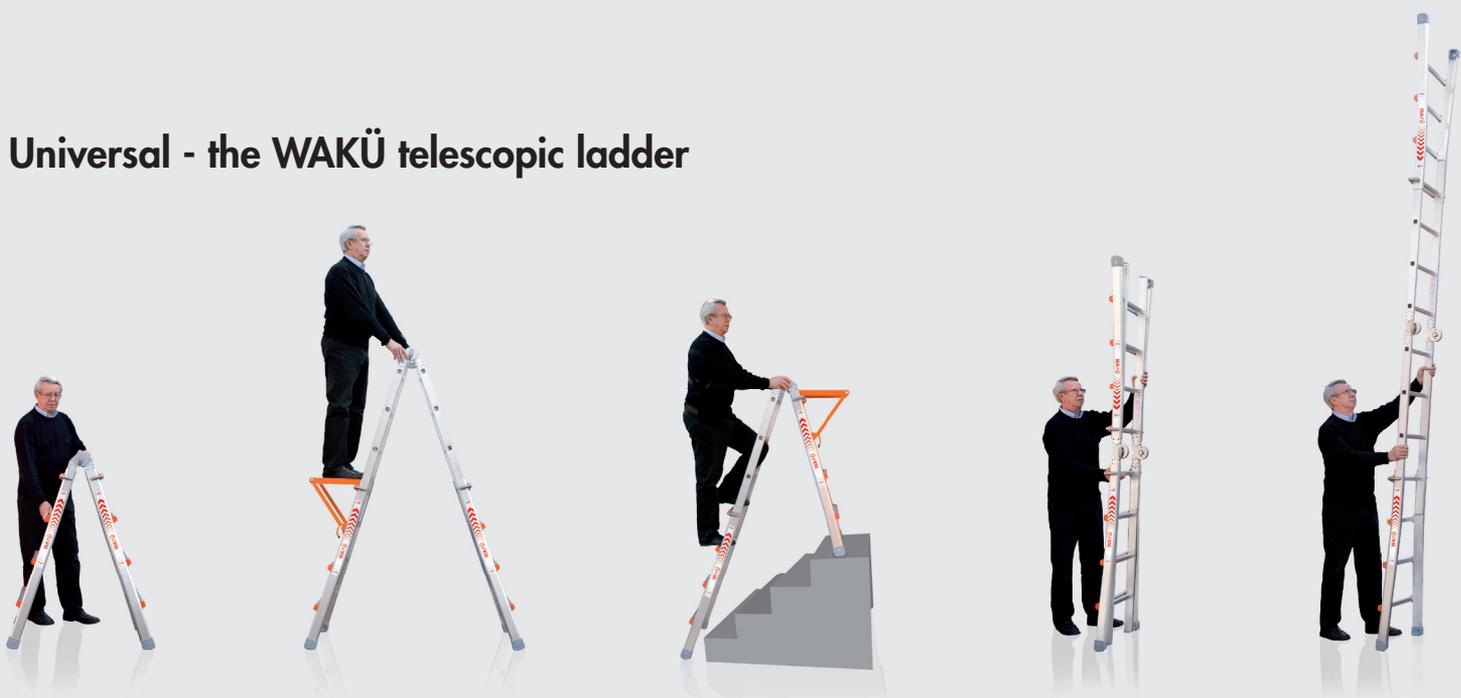

Up to any challenge

WAKÜ telescopic ladders:	Art. No. 100	Art. No. 101	Art. No. 102	Art. No. 103
Transport length: (storage size)	1,02 m	1,29 m	1,57 m	1,85 m
Weight	10 kg	13 kg	16 kg	20 kg
Double ladder: height-adjustable, from the top rung level:	3-5 rung 1,34 m	4-7 rung 1,86 m	5-9 rung 2,40 m	6-11 rung 2,92 m
Single extending ladder: height-adjustable, from maximum ladder length:	6-10 rung 3,10 m	8-14 rung 4,20 m	10-18 rung 5,30 m	12-22 rung 6,40 m
Step ladder:	all 4 models can be used as offset ladders on steps/stairs and on gradients.			

Universal - the WAKÜ telescopic ladder

Accessories for WAKÜ telescopic ladder

enwkt0308

A Hook-on platform (Art. No. 104)

The platform provides a comfortable, safe standing area, or can be used as a shelf for buckets and tools.

It hooks onto any rung, and is easily pushed inside for the user to climb past.

B Stringer extension (Art. No. 105)

Continuously height-adjustable, for use of the ladder on a spiral staircase or with a single ladder on uneven ground.

C Wall stand-off (Art. No. 106)

Includes a practical tool grid. Telescopic adjustment of wall stand-off distance. Spring clips for quick fitting.

The stand-off makes it easier to work while standing on the upper rungs.

D Ground spikes (Art. No. 109)

The screw-fit spikes provide ideal grip for your WAKÜ telescopic ladder on soft ground, including lawns.

E Ladder apex (Art. No. 110)

The ladder apex allows you to rest your WAKÜ telescopic ladder directly on a window frame.

F Extension (Art. No. 112)

In those situations where you are unable to lean your WAKÜ telescopic ladder against a support, the extension provides valuable added working height.

G Telescopic platform (Art. No. 123)

Aluminium platform, continuously extendable to almost double the retracted size. Sturdy, non-slip, lighter than a wooden platform and precisely adjustable to any required length up to the maximum.

Length: 2.04 m – 3.50 m

Width: 0.28 m

Weight: 13 kg
